INDEX

- Basic Commands
- Simple Crud Operations
- About MongoDB

Basics Commands

1. Create a Database:
 - use myNewDatabase
2. Show all databases:
 - show dbs
3. Create a Collection:
 - db.createCollection("customer")
4. Show all collections:
 - show collections

CRUD Operations

// Create

```
db.collection.insertOne({  
  name: 'srikar',  
  age: 21  
});
```

// Read

```
db.collection.findOne({  
  name: 'srikar'  
});
```

// Update

```
db.collection.updateOne(  
  { name: 'srikar' },  
  { $set: { age: 15 } }  
);
```

// Delete

```
db.collection.deleteOne({  
  name: 'srikar'  
});
```

About

1. MongoDB is a document-oriented NoSQL database.

About

1. MongoDB is a document-oriented NoSQL database.
2. MongoDB stores data in collections instead of tables.

About

1. MongoDB is a document-oriented NoSQL database.
2. MongoDB stores data in collections instead of tables.
3. MongoDB is written in C++.

About

1. MongoDB is a document-oriented NoSQL database.
2. MongoDB stores data in collections instead of tables.
3. MongoDB is written in C++.
4. MongoDB is a schema-less database.

About

1. MongoDB is a document-oriented NoSQL database.
2. MongoDB stores data in collections instead of tables.
3. MongoDB is written in C++.
4. MongoDB is a schema-less database.
5. MongoDB is highly scalable and can handle huge amounts of data.
